Deliverable 2 - Buddy Team's Evaluation
SE2: Software Design and Architecture (CS446, ECE452, CS646)

Description

Each team will be assigned to review the proposal document from another team. We will adopt a double-blind review process, i.e., the reviewers do not know the authors of the document, and the authors do not know who reviewed their document. Identification information will be removed from the proposal documents before you receive them.

Please read the proposal assigned to your team. Your goal is to check:

- Which population of humans could be harmed by this app? The population may or may not be a user population mentioned in the proposal. Often times, developers think the app is intended for one user population, but they could be used by others and there are harms that may be present for unidentified user populations.

- What harms will each of the above identified populations face?

Your review should be a PDF document in letter size. The page limit is **2 pages** (excluding acknowledgements and references). **Do NOT include any identifying information (such as authors or group number) in your review, except for the file name.** The font size of the main text should be 11pt. The document should be uploaded to Learn; only one team member needs to upload this document. The file name should be `cs446-d2_<group-number>_<project-name>.pdf` (use - instead of space in project name; use your group's project name so that it helps us grade).

Assessment

This deliverable accounts for 5% of your final grade.
